

ASEQ A ARMAN SHEKH (Nadim)

Full Stack PHP Developer · Laravel · 12+ Years Experience

Badalona, Barcelona, Spain · +34 620019615 · armannadim@msn.com

linkedin.com/in/armannadim

PROFESSIONAL PROFILE

Full stack PHP developer with more than 12 years of professional experience designing, building and maintaining web applications and business systems. Strong backend foundation in PHP and Laravel, complemented by hands-on frontend work with JavaScript, React and modern component frameworks, plus practical experience across REST API design, relational databases, e-commerce platforms and third-party system integration.

Currently combining consultancy and product development with the technical direction of a digital printing and stationery business, where I own the full stack end to end: multilingual Laravel web platforms, WooCommerce storefronts, an Electron/React point-of-sale application, automated data pipelines and self-hosted infrastructure. Comfortable working in international, multi-language teams and fluent across Catalan, Spanish, English and Bengali.

TECHNICAL SKILLS

Backend	PHP 7/8, Laravel, MVC architecture, Eloquent ORM, Blade, REST API design, queues & scheduled jobs, Composer, Java (foundation)
Frontend	JavaScript (ES6+), TypeScript, React, HTML5, CSS3, Bootstrap, Tailwind, responsive UI, jQuery
Databases	MySQL / MariaDB, SQLite, PostgreSQL, schema design, query optimisation, migrations
E-commerce	WooCommerce & WordPress plugin development, product data pipelines, payment and shipping integrations, catalogue automation
DevOps & Tools	Git, Linux server administration, cPanel/WHM, Docker basics, WSL2, Tailscale/WireGuard networking, Microsoft 365 & DNS/mail configuration
Integrations	Third-party REST APIs, Google Cloud Translation API, Google Sheets API, AI/LLM APIs (Gemini, Claude vision) for data extraction and enrichment
Practices	Agile/Scrum, code review, technical documentation, SEO-aware development (hreflang, JSON-LD, sitemaps), i18n / multilingual applications
Languages	Catalan (fluent) · Spanish (fluent) · English (professional) · Bengali (native)

PROFESSIONAL EXPERIENCE

Founder & Technical Lead | Copyus — Digital Print & Stationery

TecnoCampus Mataró, Barcelona · 2025 – Present

- Designed and built copyus.es, a trilingual (Catalan/Spanish/English) Laravel + Blade web platform, and led its repositioning from a product-category structure to a B2B, use-case-oriented site targeting businesses, startups, event organisers and campus departments.
- Ran a full technical SEO overhaul of the platform — resolving zero-indexation issues and implementing hreflang, JSON-LD structured data, canonical tags and dynamic sitemaps across all three locales.
- Developed and maintain WooCommerce storefronts including a dropshipping operation for the Spanish market, plus a custom WordPress/WooCommerce plugin that batch-translates supplier product data via the Google Cloud Translation API with fallback logic and error recovery.

Backend Developer (PHP / Laravel) | E-TIC Sistemas — Grupo Alten (RWE)

Barcelona, Spain · 2018 – 2025

- Worked for a single client during the period of I spent in E-tic/Alten. My client was RWE, an international, renewable energy service provider with office in Germany.
- Developed and maintained business web applications in PHP and Laravel for enterprise clients, covering backend architecture, database design, REST API endpoints and Blade-based interfaces.
 - Worked within agile delivery teams alongside frontend, QA and project management colleagues, participating in sprint planning, code review and technical estimation.

- Integrated third-party services and internal systems, handling authentication, data synchronization and error handling across service boundaries.
- Refactored and modernized legacy PHP codebases, improving maintainability, performance and test coverage.

PHP / Web Developer | Itteria

Barcelona, Spain · 2013 – 2018

Junior programmer at Itteria (Grupo SEIDOR). My contribution in this company is to resolve problems in different application running in the Education department of catalunya. We work as a team on various project.

- MeRLi (Catalog of educational resources) - Java, Oracle Sql.
This application contains few more sub applications.
URL of public search engine of this application is:
<http://aplitic.xtec.cat/merli/>
- APLI_SSTT (Territorial Services portal) - PHP, MySQL
This portal controls all the centers of different zone of Catalunya, carers of different centers, needed students list of each carers, calendar of each centers etc.
It's a backend application only super administrator, admin of each territorial service and centers have acces to this application using XTEC(Xarxa Telematic Educatiu De Catalunya) Ldap service.
- Simulator Marsupial (Module of Moodle) - PHP, MySQL
It's a simulator of module of the Moodle. This simulator contains data of virtual books providers moodle activities.
- GESISA (Education management system of Escuela Superior de Artes Plastiques) - PHP, Oracle, Moodle
This is application is in the building process. It's a total education management system of the institute ESDAP. Inscription, admission, results, classroom assign, certificate etc is being managed by this application. I worked in some module. Main module of this application is created on row PHP but the user management and authentication has been linked with the moodle. At this moment I'm not on this project because I've overloaded with the task of transformation process of the server of the education board.
- Petites Histories (Small histories) - PHP, MySQL
It's a very small application created in php. This application is usually used by the students of primary school to build histories.
- Deliciousdia.com (wordpress)
Catalog of new products of DIA.
- Tuctuc (laravel, angularjs)
Production and sales management system of kids' fashion house TUCTUC.

PHP / Web Developer | nGlobo Devices

Cardedeu, Barcelona, Spain · 2012 – 2013

- Starstim brain test data management system - JAVA, JSP, MySql
We've developed the application to register test data of every patient treated by a doctor. This application is usually used by the center who uses this device in their center. It's a backend type application and it's only used in an intranet.

<https://nube.neuroelectrics.com>
- AIFICC online Course - Moodle
AIFICC (Associació d'Infermeria Familiar i Comunitària de Catalunya) offers some online courses using moodle.

<http://aula.aificc.cat>
- PrintReport Online shop - PHP, MySQL, Html, css, JQuery
I was involved in the initial development process of this online shop part of this project. It's a ecommerce site but we didn't use any e-commerce CMS to develop this site. It was based in raw PHP using template from themeforest.com. As I'm not working for this company the new in charge of this project has made some changes on the design of this project for example shopping cart and pagination design, product list design etc.

<http://www.printreport.es/tienda/?cap=Ordenadores>

- TermosunSync backend - Java, jsp, Html, css, JQuery
This is another backend application made for the company termosun. This application tracks activities of their products installed in their client's space. I had to redesign the backend and resolve some problems that occurred during my stay in the company.
